IMPACT

FARLEY FAMILY **DONOR FAMILY**

"Our son's donations have made a large impact on our lives. We now live like there is no tomorrow because after losing our 5-year-old son Cale in December of 2021, we have found that everything can be gone in an instant.

Our son was ultimately declared brain dead after having a very bad seizure. We later found out he was diagnosed with a rare form of epilepsy called FIRES syndrome. His diagnosis was one in one million.

Cale was able to save three lives with his gifts of donation, and we feel good knowing he is able to live on through others. He will always be our little one in a million."

GIFT

MELISSA NELSON PANCREAS RECIPIENT

"In my early 20's, during my senior year of nursing school, I was diagnosed as a Type 1 diabetic. At that time, it felt like my world was turned upside down. How do I manage this? What do I eat? What can I do? After adjusting to the new diagnosis, I made the best effort to live a "normal" life. I participated in sports and was able to have a child. Eventually with all the effort to maintain diabetes, I still became very ill. My husband would constantly worry if I was going to wake up in the morning. My body eventually wasn't recognizing my lows until they were critical, and my numbers were dropping faster than my devices would detect. With this scary situation, I became a candidate for a pancreas transplant. In 2019, after 10 years of being a Type 1 diabetic, I received the gift of life shortly after being placed on the transplant list. My donor's final gift of generosity greatly improved my life. I have everlasting gratefulness and love to my donor, their family and the transplant team that cared for me. I am now able to experience and participate in more activities without the constant worry of my blood sugars and lugging around extra equipment to remain safe and healthy. I have so much more freedom and time to spend with my family. Every day I reflect on the gift that I received, and I think about my donor and their family. I am so thankful for the gift of organ donation and this journey that I am on. Organ donation can make a difference in so many lives, not just for one individual but an entire family."

Please support Iowa Donor Network's mission and those waiting on the transplant list by making a financial contribution in 2023. We all have the potential to save and enhance lives by being registered donors and by financially contributing to further IDN's mission of working together to transform lives through organ and tissue donation.
